EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science (Honours), Co-operative Program — GPA: 3.9/4.0 Sep. 2025 – Apr. 2030 (expected)

- President's Scholarship w/ Distinction, BC Provincial District/Authority Scholarship

EXPERIENCE

Software QA Automation Engineer (Co-op)

May 2026 – Aug. 2026

Method Integration (Method CRM)

Toronto, ON

- Collaborated with a **team of 11** to improve QA efficiency, consulting senior engineers to design and roll out a **test-case organization system** that cut failure-triage time by **29%**
- Merged **120+ pull requests** into production **Playwright/TypeScript** suites, fixing daily **CI/CD** failures
- Architected a **mobile test suite (20+ tests)** for **iOS/Android** with **WebdriverIO + Appium** from scratch
- Took on development work, bringing **ms-scheduler-api** under **Computable Verifiable Requirements** so service behaviour is validated against explicit, testable specifications

Math Tutor

Jun. 2023 – Aug. 2023

RootMaths Math Tutoring

Coquitlam, BC

- Coached middle-schoolers **remotely** for **math contests** across number theory, combinatorics, and geometry
- Explained abstract concepts clearly to students aged 8 to 10 through **50+** worked problems, building **problem-solving** habits

PROJECTS

HardHq '25 | *Python, ANSYS HFSS*

Nov. 2025

- **Won first place** among **20+ teams** at Canada's only quantum hardware hackathon
- Developed **Python** scripts to **automate** ANSYS HFSS simulations, increasing efficiency by **2500%**
- Designed a superconducting qubit with optimized coupling of **35.8 MHz** against **900 MHz** detuning
- Collaborated through an **Agile workflow** and delivered a **technical presentation** to expert judges

The Air Outside [Demo](#) | | *Blazor WebAssembly, .NET 10, C#, Ink DSL*

May 2026

- Built a web **visual novel (15 scenes, 9 endings)** on **Blazor WebAssembly / .NET 10**, fully client-side
- Decoupled an **Ink DSL** narrative layer from the **C#/Blazor** renderer via a compiled **story.json** intermediate
- Hand-coded **100+ SVG** illustrations and a **procedural Web Audio** synth with zero shipped assets
- Deployed to **Vercel** and packaged as a self-contained **Windows desktop app (WPF + BlazorWebView)**

StockStalker [Demo](#) | | *TypeScript, React, Financial Data APIs*

Jun. 2026

- Built a **stock and ETF dashboard** to search tickers, chart **live price history**, and surface market news
- Implemented **fund comparison** across expense ratio, yield, **AUM**, volatility, and top holdings
- Engineered a **portfolio tracker** for market value, unrealized **P/L**, allocation, and automated risk flags
- Generated a news-driven **Quick Take** thesis with a **confidence score** from price trends and cited articles

Clothing E-Commerce Platform [Demo](#) | *Next.js, TypeScript, PostgreSQL, Stripe, PayPal*

Jan. 2026

- Built a **full-stack online store** (browse, cart, checkout) with an **admin dashboard** for inventory and analytics
- Developed with **Next.js** (file routing, **SSR**) on serverless **PostgreSQL (Neon)**, deployed to **Vercel**
- Integrated **Stripe** and **PayPal** checkout with **NextAuth** sessions and server-side **Zod** validation
- Built a responsive **React + ShadCN** UI, using **server components** to cut client-side JavaScript

SKILLS

Languages: Java, C, C++, Python, TypeScript, JavaScript, Rust, C#, Racket, SQL, HTML/CSS, Bash

Frameworks/Libraries: React, Next.js, Blazor/.NET, Tailwind CSS, NextAuth, Zod, ShadCN UI, Vite

Testing: Playwright, WebdriverIO, Appium

Developer Tools: Git, Azure DevOps, CI/CD, TFS, MongoDB, PostgreSQL, VS Code, Linux, Vercel

APIs/Services: Stripe, PayPal, REST APIs

Relevant Courses: Advanced Functional Programming (Racket), Algorithm Design, Linear Algebra, Calculus
